

TaskFlow

Frequently Asked Questions

Everything you need to know about plans, billing, accounts, teams, integrations, and security.

Pricing Plans

Q: What pricing plans does TaskFlow offer?

A: TaskFlow offers four plans: Free, Starter, Professional, and Enterprise. Each tier adds more storage, automation, integrations, and admin controls, so you can start small and upgrade as your team grows. You can compare full feature breakdowns anytime on our Pricing page.

Q: Is there a free plan, and what does it include?

A: Yes! The Free plan supports up to 5 users and 3 active projects, with core task management, kanban boards, and basic reporting included. It's a great way to try TaskFlow before committing to a paid tier, and there's no time limit on how long you can use it.

Q: What's the difference between monthly and annual billing?

A: Annual billing gives you a 20% discount compared to paying month-to-month, billed as a single upfront payment for the year. Monthly billing offers more flexibility if you're not ready to commit long-term. You can switch between the two billing cycles at any time from your account settings.

Q: Do you offer discounts for nonprofits or students?

A: Yes, we offer a 30% discount for verified nonprofit organizations and a 50% discount for students and educators. Simply apply through our Community Programs page with proof of eligibility, and our team will review your request within 2 business days. Approved discounts are applied automatically to your next invoice.

Q: Can I try a paid plan before purchasing?

A: Absolutely — every paid plan comes with a 14-day free trial, no credit card required to start. You'll have full access to that plan's features so you can evaluate whether it fits your team's workflow. If you need more time to decide, just reach out to support and we're happy to extend it.

Billing & Payments

Q: What payment methods does TaskFlow accept?

A: We accept all major credit and debit cards, including Visa, Mastercard, and American Express, as well as PayPal. Enterprise customers can also pay via invoice and bank transfer. All transactions are processed securely through our PCI-compliant payment partner.

Q: When will I be charged for my subscription?

A: Your card is charged immediately when you upgrade to a paid plan, and then automatically on the same date each billing cycle. For annual plans, that means once per year; for monthly plans, once per month. You'll always receive an email receipt confirming the charge.

Q: Can I change my billing information or update my card?

A: Yes, you can update your billing details anytime from Account Settings > Billing. Simply enter your new card information and it will be used for all future charges. If a payment fails, we'll retry a few times and notify you by email before any service interruption.

Q: Will I be notified before my subscription renews?

A: Yes, we send a renewal reminder email 7 days before any annual subscription renews, so there are no surprises. Monthly plans don't include a reminder by default, but you can enable one in your notification preferences. You can also view your next billing date anytime in your dashboard.

Q: How do I get a copy of my invoice or receipt?

A: All invoices and receipts are available for download in Account Settings > Billing > Invoice History. We also email a PDF receipt automatically every time a payment is processed. If you need an invoice reissued with different company details, just contact our billing team.

Q: Do prices include sales tax or VAT?

A: Displayed prices are exclusive of tax, and applicable sales tax or VAT is calculated based on your billing address at checkout. The exact amount will be shown before you confirm payment and itemized on your invoice. If you're tax-exempt, you can upload documentation in your billing settings.

Cancellation & Refunds

Q: How do I cancel my TaskFlow subscription?

A: You can cancel anytime from Account Settings > Billing > Manage Subscription by clicking "Cancel Plan." Your account will remain active with full paid features until the end of your current billing period. There are no cancellation fees or hoops to jump through.

Q: What happens to my data if I cancel?

A: Your projects, tasks, and files remain accessible in read-only mode for 30 days after cancellation, giving you time to export anything you need. After that window, your workspace data is permanently deleted from our servers. We recommend exporting a full backup before your access period ends.

Q: Can I get a refund if I'm not satisfied?

A: We offer a full refund within 14 days of your initial purchase, no questions asked — just contact support and we'll process it within 5 business days. Refunds outside that window are evaluated case by case, particularly for annual plans. We genuinely want you to be happy with TaskFlow, so reach out if something isn't working for you.

Q: If I cancel mid-cycle, do I get a prorated refund?

A: Monthly plans don't include prorated refunds for partial months, since access continues through the end of the billing period. Annual plans canceled mid-year may qualify for a prorated refund of unused months at our discretion. Contact billing support and we'll review your specific situation.

Q: Can I pause my subscription instead of canceling?

A: Yes, Professional and Enterprise plans can be paused for up to 3 months, which stops billing while preserving all of your data untouched. This is a great option for seasonal teams or projects on temporary hold. You can reactivate anytime from your account dashboard.

Account Management

Q: How do I create a TaskFlow account?

A: Just visit taskflow.example.com/signup and register with your email address or by connecting a Google or Microsoft account. You'll be guided through a short onboarding flow to set up your first workspace. No credit card is required to get started on the Free plan.

Q: How do I reset my password?

A: Click "Forgot Password" on the login screen and enter the email associated with your account. We'll send a secure reset link that expires after 60 minutes for your protection. If you don't see the email within a few minutes, check your spam folder or contact support.

Q: Can I merge two TaskFlow accounts into one?

A: We currently don't support automatic account merging, but our support team can manually migrate projects and data from one account to another. Just reach out with both account emails and details on what you'd like transferred. This process typically takes 3–5 business days.

Q: How do I delete my account permanently?

A: You can request account deletion from Account Settings > Privacy > Delete Account, which triggers a confirmation email to prevent accidental deletion. Once confirmed, all associated data is permanently removed within 30 days. This action cannot be undone, so we recommend exporting your data first.

Q: Can I change the email address linked to my account?

A: Yes, go to Account Settings > Profile and update your email address, then verify the new address via the confirmation link we send. Your workspace, projects, and history stay exactly the same. For security, we'll also send a heads-up notice to your old email address.

Team & User Permissions

Q: How many team members can I add to a workspace?

A: The number of seats depends on your plan: Free supports up to 5 users, Starter up to 20, and Professional and Enterprise offer unlimited seats. You only pay for active users on paid plans, and you can add or remove teammates at any time. Removed seats stop billing immediately on your next cycle.

Q: What user roles and permission levels are available?

A: TaskFlow supports four roles: Owner, Admin, Member, and Viewer, each with progressively more restricted access. Owners and Admins can manage billing, integrations, and permissions, while Members can create and edit tasks within assigned projects. Viewers have read-only access, ideal for stakeholders who just need visibility.

Q: Can I set different permissions for different projects?

A: Yes, Professional and Enterprise plans support project-level permissions, so a user can be an Admin on one project and a Viewer on another. This is managed from each project's Settings > Members tab. It's especially useful for agencies or teams working with external collaborators.

Q: How do I invite new team members?

A: Go to Workspace Settings > Members and click "Invite People," then enter their email addresses and choose their role. They'll receive an email invitation with a link to join your workspace directly. Pending invitations can be resent or revoked anytime from the same screen.

Q: Can guests or external clients access specific projects only?

A: Yes, Guest access lets you invite external collaborators to a single project without giving them visibility into your broader workspace. Guests don't count toward your regular seat limit on Professional and Enterprise plans. You can revoke guest access at any time once the project wraps up.

Integrations

Q: What tools does TaskFlow integrate with?

A: TaskFlow connects natively with Slack, Google Workspace, Microsoft Teams, GitHub, Figma, and Zoom, among others. These integrations let you sync notifications, attach files, and link commits or design files directly to tasks. You can browse the full list in the Integrations tab of your workspace.

Q: Does TaskFlow offer an API for custom integrations?

A: Yes, our REST API is available on Professional and Enterprise plans and lets you build custom integrations, automations, and reporting tools. Full documentation, including authentication and rate limits, is available in our Developer Portal. We also support webhooks for real-time event notifications.

Q: Can I connect TaskFlow to Zapier or Make?

A: Yes, TaskFlow has official apps on both Zapier and Make, letting you automate workflows with thousands of other apps without writing code. Common use cases include auto-creating tasks from form submissions or syncing due dates to a calendar. Setup takes just a few minutes from either platform.

Q: How do I set up the Slack integration?

A: Go to Integrations > Slack in your workspace settings and click "Connect," then authorize TaskFlow in your Slack workspace. Once connected, you can choose which channels receive task updates and mentions. You can also create and comment on tasks directly from Slack using the /taskflow command.

Q: Will removing an integration delete any of my data?

A: No, disconnecting an integration only stops future syncing — it doesn't delete tasks, comments, or files that were already created in TaskFlow. Any links to the external tool will simply become inactive. You can reconnect the integration at any time to resume syncing.

Data Security

Q: How does TaskFlow protect my data?

A: All data is encrypted in transit using TLS 1.2+ and at rest using AES-256 encryption. We run regular third-party security audits and penetration tests to identify and address vulnerabilities proactively. Our infrastructure is hosted on SOC 2 Type II certified cloud providers.

Q: Where is my data stored?

A: By default, data is stored in secure data centers in the United States, with an EU data residency option available for Professional and Enterprise customers. This lets teams with regional compliance requirements keep data within specific jurisdictions. Contact sales if you need a data residency guarantee in your contract.

Q: Is TaskFlow compliant with GDPR and other privacy regulations?

A: Yes, TaskFlow is fully GDPR compliant and offers a Data Processing Agreement (DPA) for customers who need one. We also align with CCPA requirements for California users and support data subject access requests. Our full privacy policy and compliance documentation are available on our Trust Center page.

Q: Does TaskFlow offer two-factor authentication (2FA)?

A: Yes, we strongly recommend enabling 2FA, which you can set up in Account Settings > Security using an authenticator app or SMS. Enterprise plans can also enforce mandatory 2FA and single sign-on (SSO) for all workspace members. This adds an important extra layer of protection against unauthorized access.

Q: How often is my data backed up?

A: TaskFlow performs automated backups every 24 hours, with backups retained for 30 days on a rolling basis. In the unlikely event of data loss, our team can restore your workspace from the most recent backup point. Enterprise customers can also request custom backup schedules and longer retention windows.

Still have questions? Reach out to our support team anytime at support@taskflow.example.com — we're happy to help.
